Writing an abstract

What is an abstract?

An abstract is a concise summary of a research paper or entire thesis.

Why write an abstract?

Selection:

- Abstracts allow readers who may be interested in the paper to quickly decide whether it is relevant to their purposes and whether they need to read the whole paper.

Why write an abstract?

Indexing:

Most academic journal databases accessed through the library enable you to search abstracts. This allows for quick retrieval by users. Abstracts must incorporate the key terms that a potential researcher would use to search.

When to write abstracts?

submission of articles to journals

application for research grants

completion and submission of
theses

submission of proposals for
conference papers

What to include in an abstract

1. Reason for writing:
What is the importance
of the research?
Why would a reader be
interested in the larger
work?

What to include in an abstract

2. Problem:

What problem does this
work attempt to solve?

What is the scope of the
project?

What is the main
argument, thesis or claim?

A pair of black-rimmed glasses with round lenses is resting on an open notebook. The notebook has a red ribbon bookmark. The background is blurred, showing a wooden surface and some papers.

What to include in an abstract

3. Methodology:

An abstract of a scientific work may include specific models or approaches used in the larger study.

Other abstracts may describe the types of evidence used in the research.

A pair of black-rimmed glasses with round lenses is resting on an open notebook. The notebook has a red ribbon bookmark. The background is blurred, showing a wooden surface and some papers.

What to include in an abstract

4. Results:

An abstract of a scientific work may include specific data that indicates the results of the project.

Other abstracts may discuss the findings in a more general way.

What to include in an abstract

5. Implications:

How does this work add to the body of knowledge on the topic?

Are there any practical or theoretical applications from your findings or implications for future research?

A structured abstract

- ***Abstract*** - a short summary of the article
- ***Keywords*** - words that describe key aspects of the article
- ***Introduction and statement of problem*** - identifies the need for the research question. In rigorous research, may include a hypothesis which is supported or refuted accordingly
- ***Review of the literature*** - places the work in context
- ***Methodology*** - explains the methods so others can replicate the study
- ***Data collection*** - describes the process and points out potential omissions
- ***Analysis*** - examines data by qualitative or quantitative means, states whether research question or hypothesis was proven or disproven
- ***Conclusions and recommendations for further research*** - accounts for results, suggests explanations, points out things that may have been overlooked, and suggests areas for further research
- ***References*** - a list of research consulted.

Commonly-used sections in an abstract

- OBJECTIVE
- METHODS
- RESULTS
- CONCLUSIONS

Writing a research paper for publication

The background of the image shows a stack of several books resting on a light-colored wooden surface. The books are of varying thicknesses and colors, including white, grey, and dark brown. A semi-transparent dark grey overlay covers the upper portion of the image, providing a background for the white text.

How to work out what your paper is about

- What are the most important conclusions from your research?
- Who is the best audience to know about this work?
- Making contribution to any one particular theory or question?

Selecting a journal

- What's the journals standing?
- Is my research relevant to the journal?
- Are readers the right audience for this material?

Journal

Journal of Sustainable Tourism >

Use other published papers as examples

- How long are the different sections of the paper?
- How have others described the method used?
- What types of the analysis of the data or introduced the concepts?

Different Structures Different Journals

Sections	Order written
Title	1
Abstract	10
Introduction	7
Aims (last bit of introduction)	2
Methods	4
Results (Findings) Tables and Figures	5
Results (Findings) text	6
Discussion	8
Conclusions	3
Acknowledgments	9
References	11

A blue pen is positioned diagonally across the frame, pointing towards the bottom right. The background is a dark, semi-transparent overlay of a document featuring a bar chart with several blue bars of varying heights. The text is overlaid on this background.

Titles,
Aims, &
Conclusions

1. Main results
2. Important of results
3. So what?

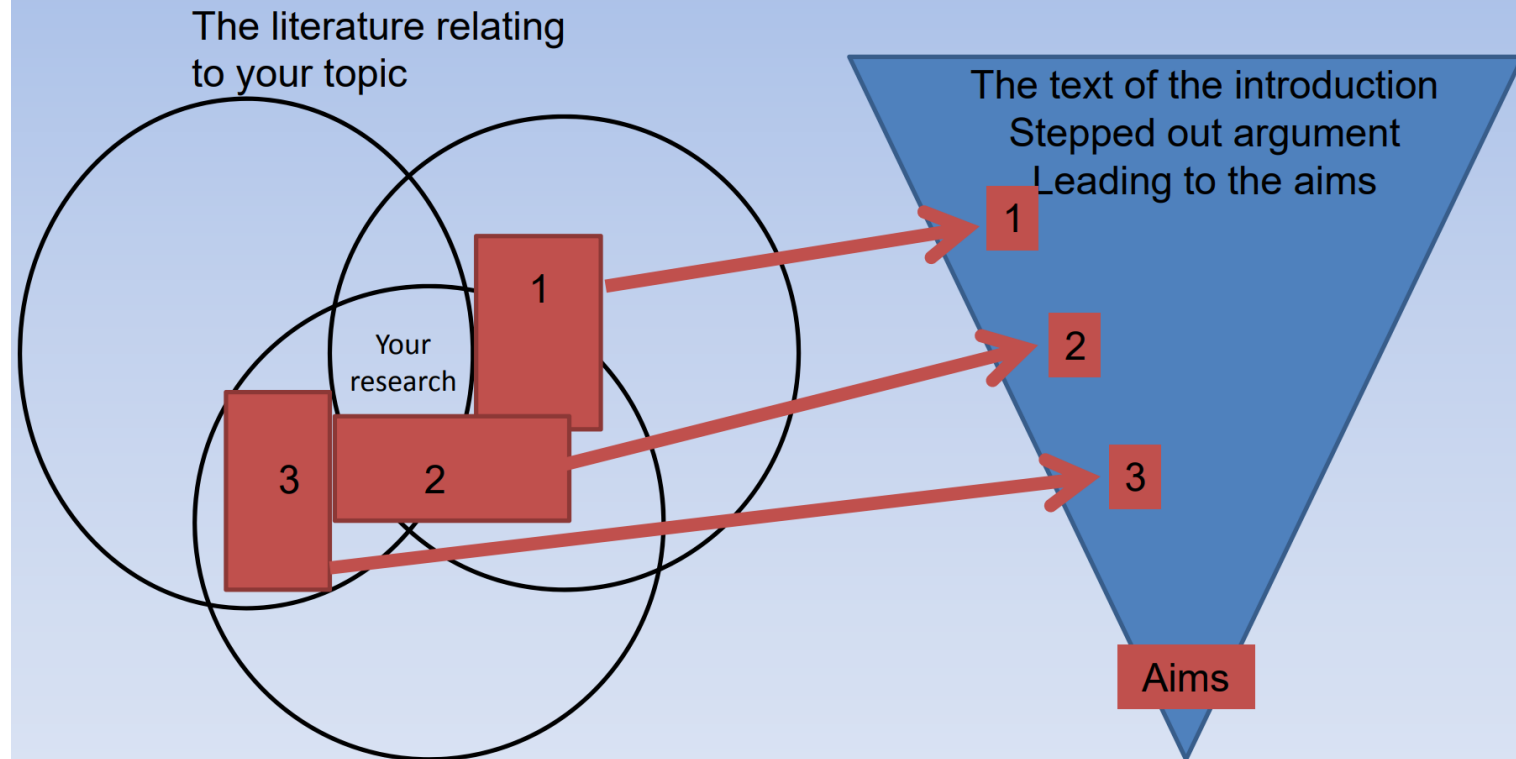

Introductions

Carefully stepped out argument from the most general to the most detailed – e.g. your aims.

Aims = key to **Golden Thread**

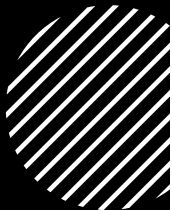

Turning circles into a triangle

Writing methods

Often first to write

Easiest: have obvious structure and content

Challenging: use a few words as possible to clearly described what you did

Describe what you did, not there was a problem what your did

Important of context in methods

- Remember that readers can be anywhere in the world. They have to understand the context of where you did the work

Results/Findings

Highlight or
summarize

Highlight or summarize important results

Match

Text must match any tables or figures

Put

Put the most important information first, in the first part of a section, in the first sentence in a paragraph, and in the first words in a sentence

Tables

How many tables do you need and do you any?

How many rows and columns are required?

Do not use spaces and tabs

Journals hate too much white spaces

Discussions

- Why they are important, and their limits.
- Often longer than introductions
- Start directly summarizing answers to aims in first paragraph
- Then paragraphs relating key results in relation to literature, e.g. contribution to knowledge
- Practical implications of research
- Research limitations and further research

Just before submitting

- Reread the author's guidelines to make sure you have formatted the manuscript, tables and figures correctly including the references, & that is not too long.
- Double check all references in text are in reference list and the reverse.
- Have the final version proofread – particular the references.

A hand holding a compass over a desert landscape with a road and a river.

IT'S TIME TO SUBMIT.
WHERE TO START?

Selecting your journal

- (a) the language in which the journal is published
- (b) its readership
- (c) the word limit
- (d) whether the journal is paper-based, electronic or both
- (e) its academic status and/or the journal's so-called impact factor
- (f) the likelihood of your paper being accepted, or
- (g) submission fees.

Guide to authors (Instructions for authors)

- The kind of papers that are included:
- the maximum length of a paper (either in pages or in number of words)
- the maximum number of graphs and tables
- the reference style and lay-out
- the expected sub-headings in the paper
- Etc.

Common mistakes

- Papers are too long
- Papers are exceeding the limit of the journal

Ethics

- Is it conducted on animals or people?
- Did you obtain permission?
- Did you have IRB approval certificate?

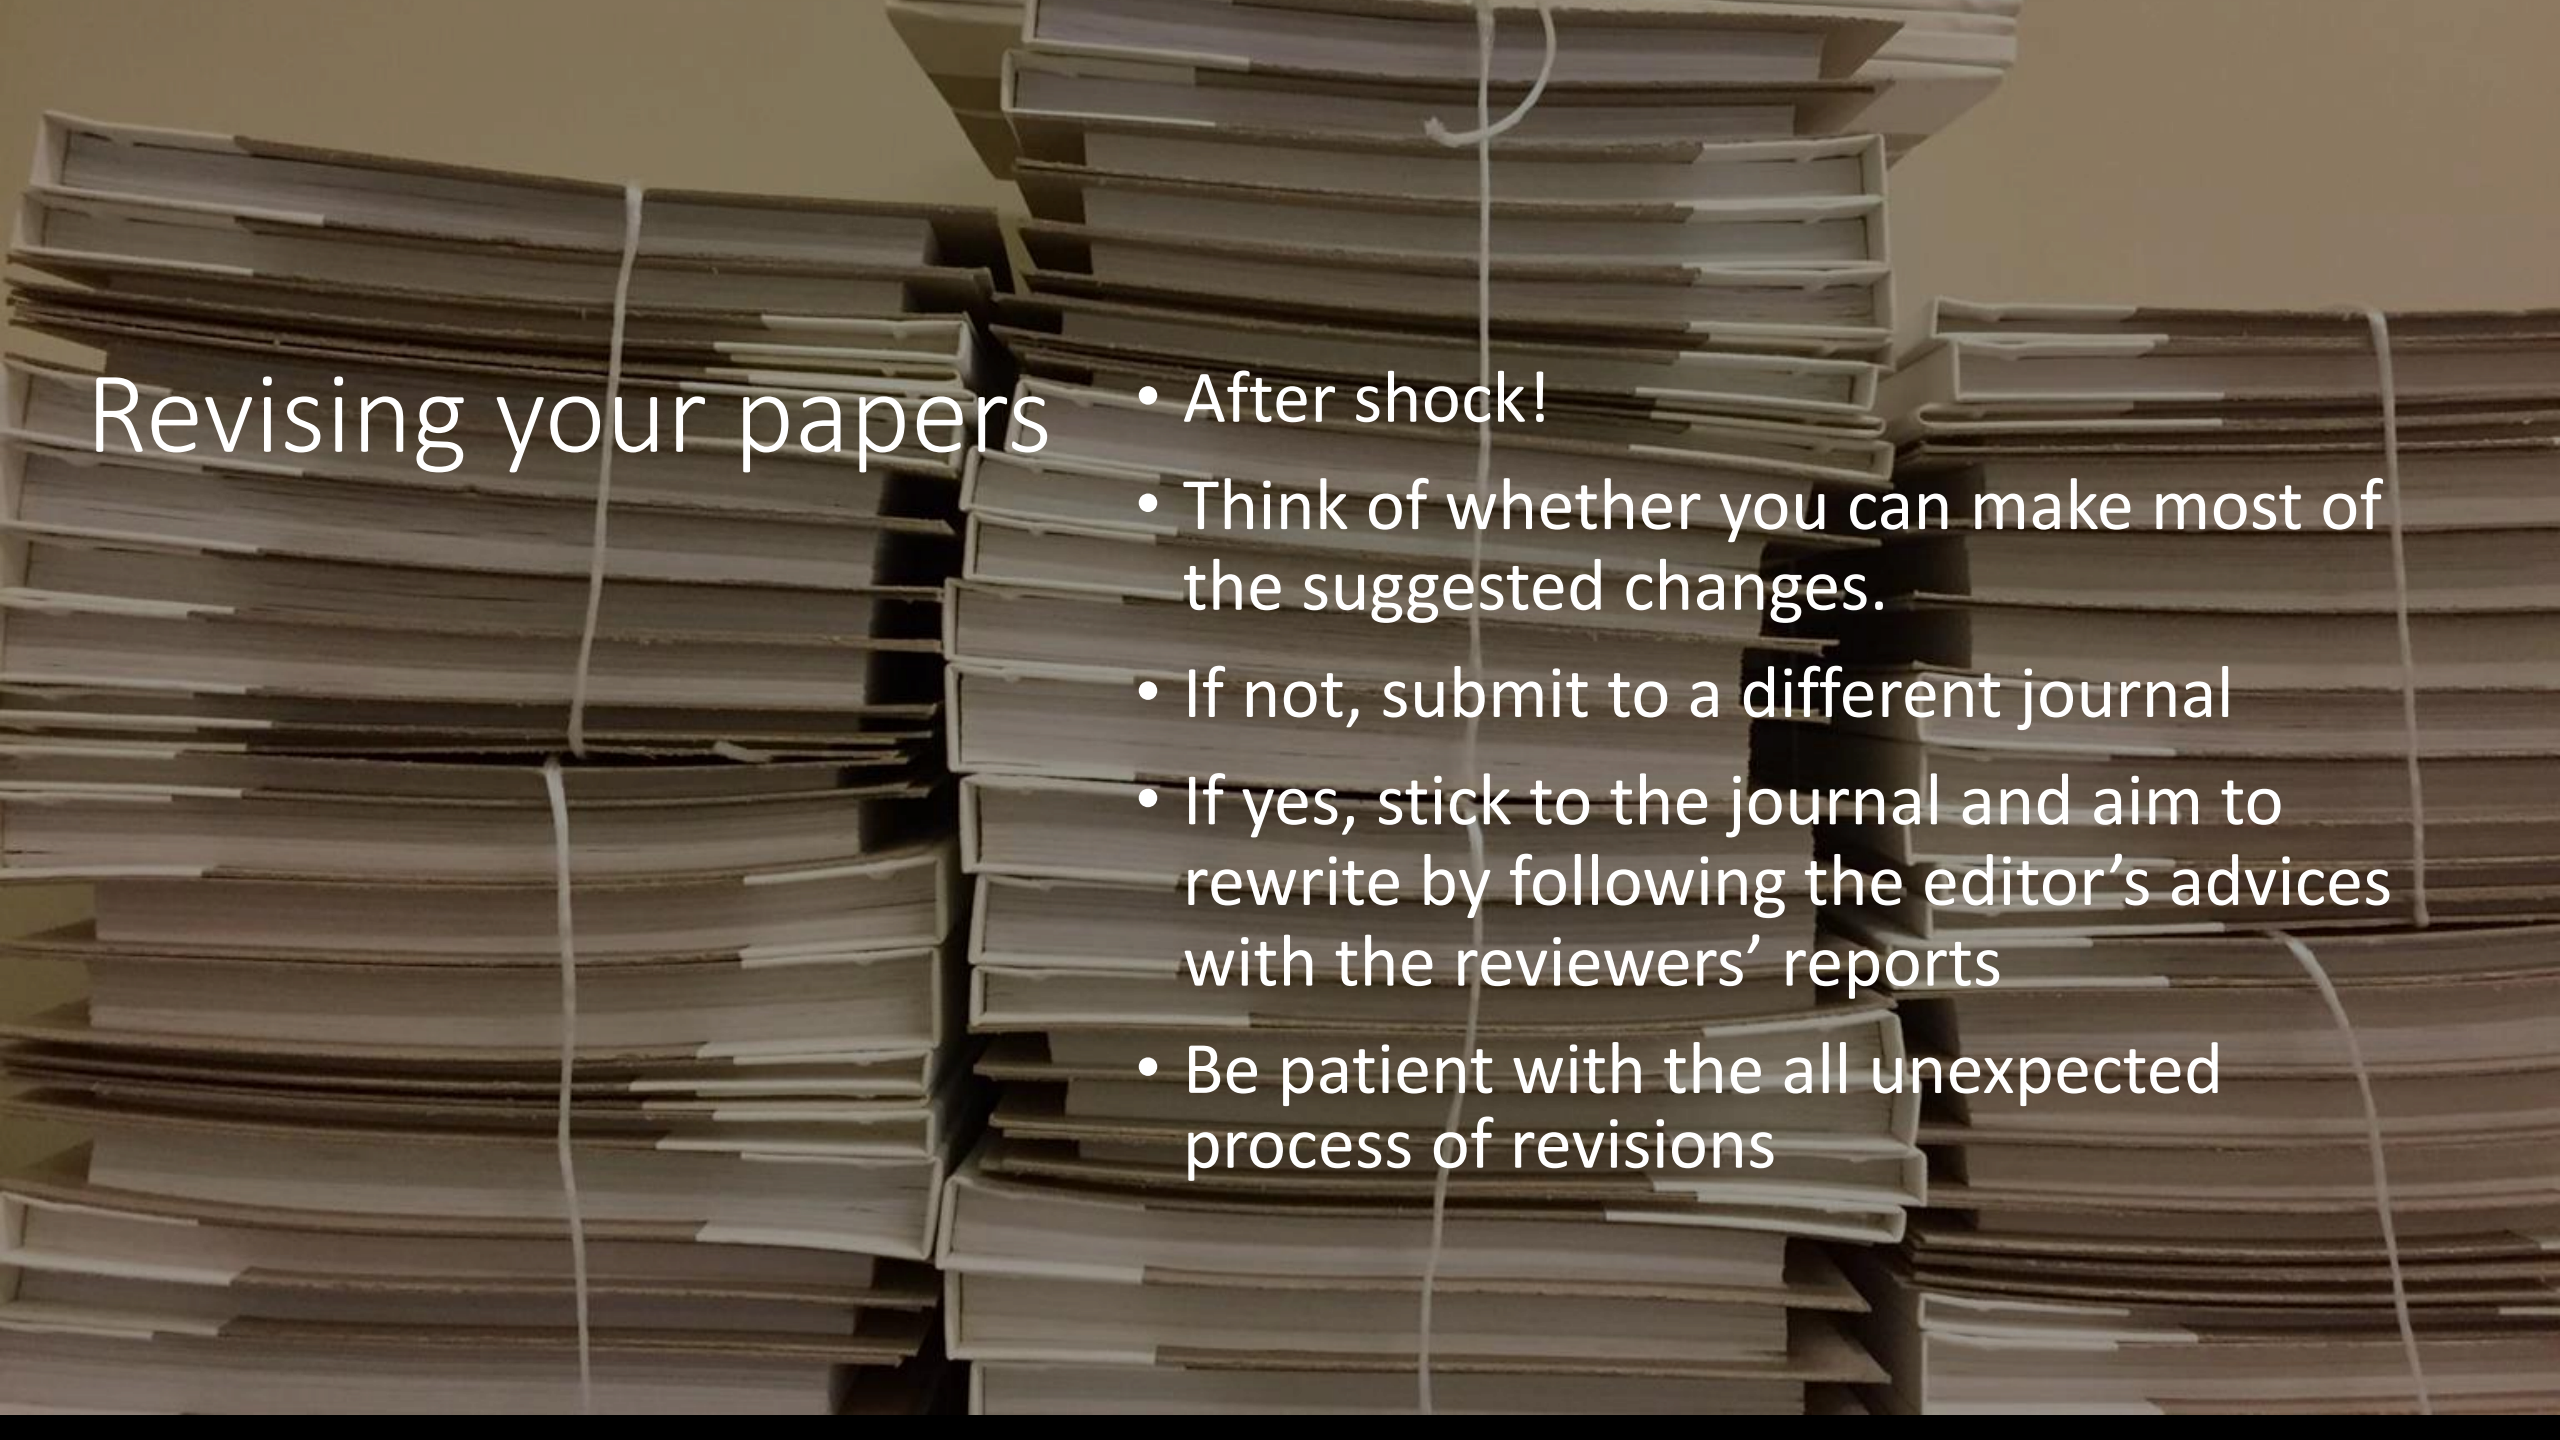

Journal operation process

- Know the way editors operate
- A quick look at the title and abstract for initial decision
- Reject or send out for review?
- Contribution to knowledge?
- Appropriateness of the research?
- Ethical considerations around the study
- Quality of the research methods used and
- Relationship between your Discussion, Conclusion and Recommendations and your actual Findings/Results

Possible editorials decisions

1. Your paper is accepted straightaway without any changes;
2. Your paper is conditionally accepted with the condition that you make certain minor changes
3. You are invited to resubmit your paper with the condition that you make certain major changes
4. Your paper is rejected.

Revising your papers

- After shock!
- Think of whether you can make most of the suggested changes.
- If not, submit to a different journal
- If yes, stick to the journal and aim to rewrite by following the editor's advices with the reviewers' reports
- Be patient with the all unexpected process of revisions

On publication

- Enjoy
- Update your CV or web pages

ARTICLE REVIEW CRITERIA

International Journal

Theoretical/
Conceptual
Soundness

Theoretical/ Conceptual Soundness

Does the article have a main thesis statement or argument?

Does the article make reference to previous related research or theories?

Does the article justify/apply the theory, if any, behind the research?

Does the article should correctly interpret and appropriately synthesis relevant prior research?

Are any new hypothesis, if any, clearly stated and tested?

Methodological
Soundness

Methodological Soundness

While research in the arts is generally different than more technical fields, the article should include background, objectives, subjects, methodology, data analysis and conclusions. Articles concerning the arts may present these aspects of a journal article in a style more relevant to the field (e.g. interpretation of scores or paintings for “data analysis”).

The reviewer should comment accurately and constructively upon the quality of the material covered.

Is the material coherent?

Are the conclusions and/or implications correctly derived from the research?

Contribution

Contribution

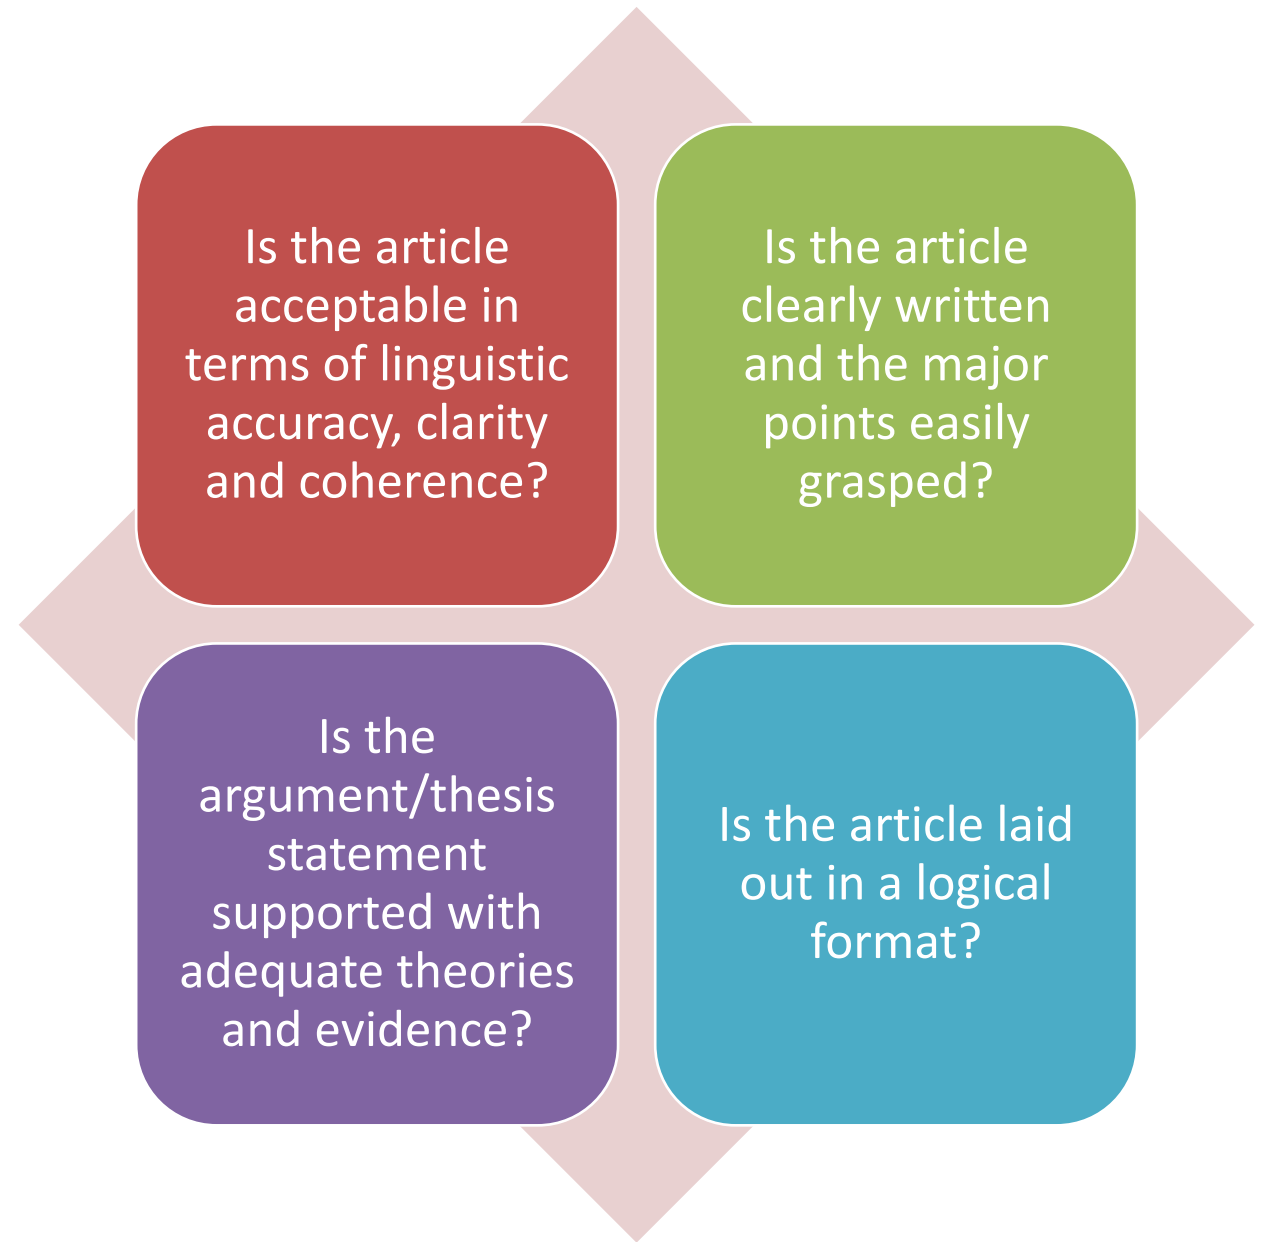

Communication

Communication

Data

Data

Are tables and figures relevant?

Has the article been laid out according to the format required by the journal?

Overall
Quality

Overall Quality

The reviewer should comment on major strengths and weaknesses of the manuscript as a written communication, independent of the design, methodology, results, and interpretation of the study.

The reviewer's comments to the author should be constructive, professional and specific. While being critical, reviewers should provide suggestions for improvements that would enhance the quality of the article.

If the reviewers suspect misconduct, they should notify the Editor in Chief in confidence and should not share their concerns with other parties unless officially notified by the journal that they may do so.

There are also spaces for comments in the reviewer form to discuss aspects of the article that does not fit exactly into the above categories.

Introducing CiteScore metrics for serials

We are proud to introduce CiteScore metrics from Scopus - comprehensive, current and free metrics for serial titles in Scopus. Search or browse below to find a source and use the new metrics. Use the annual metrics for reporting, and the 2018 metrics for up-to-date tracking. Be sure to use qualified as well as the below quantitative inputs when presenting your research impact, and always use more than one metric for the quantitative part.

About the Journal

Journal of Urban Culture Research (JUCR) is an online, double-blind peer-reviewed journal published biannually by the Faculty of Fine and Applied Arts of Thailand's Chulalongkorn University in conjunction with the Urban Research Plaza of Osaka City University, Japan. JUCR aims to promote academic knowledge and provide a forum for publication in Urban Culture Research. The first issue of JUCR (vol. 1) was published in 2010 – [Legacy JUCR](#). *Since then JUCR has published 139 articles from 32 countries throughout its 21 volume history.*

Aims and Scope

JUCR aims at establishing a broad interdisciplinary platform for studies of cultural creativity and the arts that brings together researchers and cultural practitioners to identify and share innovative and creative experiences in establishing sustainable and vibrant, livable communities while fostering cultural continuity.

JUCR has the objective of stimulating research on both the theory and practice of fine and applied arts and related disciplines such as urban planning to respond to social challenges and environmental issues as well as calling for solutions across the creative realms. Moreover, JUCR supports advocacy processes, improvements in practices, and encourages supportive public policy-making related to cultural resources.

JUCR is an open access, non-profit publication that does not charge any fees for submission nor publication. Articles submitted for consideration into JUCR are accepted with the understanding that the author has not previously submitted it to another journal or have published its contents elsewhere. JUCR uses individual volume numbers for each issue published in June and December.

Type of Papers: Original Articles, Case Studies, Guest Articles (invited), Reviews (Books, Websites, etc.), Conference Reports

Frequency: 2 issues per year (January - June & July - December)

Language: Full text in English, Abstracts in English

Humanities, Arts and Social Sciences Studies (HASSS)

FORMER NAME "SILPAKORN UNIVERSITY JOURNAL OF SOCIAL SCIENCES, HUMANITIES, AND ARTS"

Humanities, Arts and Social Sciences Studies (HASSS) is a double-blinded peer-reviewed, open-access journal published by Silpakorn University, Thailand. The main objective is to provide a forum for researchers in the fields of Humanities, Arts and Social Sciences to publish their articles. Our mission is to promote awareness of and compatibility with the dynamics of various study areas and to disseminate relevant research work to support the need for new knowledge related to art and culture, human beings and society.

ISSN (Online): 2630-0079

Language: English

Issue per year: 3 Issues (January - April, May - August, September - December)

The International Journal of Music Education (IJME) is a peer-reviewed journal published by the International Society for Music Education (ISME) four times a year. Manuscripts published are scholarly works, representing empirical research in a variety of modalities. They enhance knowledge regarding the teaching and learning of music with a special interest toward an international constituency. Manuscripts report results of quantitative or qualitative research studies, summarize bodies of research, present theories, models, or philosophical positions, etc. Papers show relevance to advancing the practice of music teaching and learning at all age levels with issues of direct concern to the classroom or studio, in school and out, private and group instruction. All manuscripts should contain evidence of a scholarly approach and be situated within the current literature. Implications for learning and teaching of music should be clearly stated, relevant, contemporary, and of interest to an international readership.

Total	4 000 – 7 000 words

WHAT WILL REVIEWERS CONSIDER?

Theoretical/Conceptual Soundness:

- Does the article have a main thesis statement or argument?
- Does the article make reference to previous related research or theories?
- Does the article justify/apply the theory, if any, behind the research?

Methodological Soundness:

- While research in the arts is generally different than more technical fields, the article should include background, objectives, subjects, methodology, data analysis and conclusions
- Is the material coherent?

Contribution:

- Does the article bridge the knowledge gap in the discipline?
- Does the article advance knowledge in/of the discipline?
- Are the findings and implications significant to their field?
- Is the paper of interest to at least a portion of the field?
- The article should also discuss the implications of the reported project, and/or report on any conclusions or products, which may be of relevance to future research, development or practice.

WHAT WILL REVIEWERS CONSIDER? (CONT.)

Communication:

- Is the article acceptable in terms of linguistic accuracy, clarity and coherence?
- Is the article clearly written and the major points easily grasped?
- Is the argument/ thesis statement supported with adequate theories and evidence?
- Is the article laid out in a logical format?

Data:

- Are tables and figures relevant?
- Has the article been laid out according to the format required by the journal?

THANK YOU

Q&A
